Dr. Joshua Lederberg, President
The Rockefeller University
1230 York Avenue
New York, NY 10021

Dear Joshua,

I thought you might like to take a glance at a report I am sending to WHO on the work I did under a grant of theirs in the second semester of 1983. Other activities during that period concern onchocerciasis, in particular evaluation of compounds in spontaneous onchocerciasis in cattle in Australia.

Evaluation of compounds has been set up in trypanosomiasis of camels in West Africa and the Niger Republic.

Yours sincerely,

EAHF/sla
